**Perth WA: 1 July 2022**

**HYBRID SYSTEMS AUSTRALIA ACQUIRES DIGITAL INTELLIGENCE, BOLSTERING ITS TECHNOLOGY CAPABILITIES ALONGSIDE EXPANSION INTO THE NORTHERN TERRITORY**

Pacific Energy Group's integrated renewables subsidiary, Hybrid Systems Australia ("Hybrid Systems") has today announced the important acquisition of Digital Intelligence in Darwin, Northern Territory.

Established in 2015, Digital Intelligence is a market leading specialist in high-end control systems, instrumentation and electrical engineering & installation.

The addition of Digital Intelligence's skills base strengthens the Company's internal capability, enabling it to remain at the forefront of rapidly evolving technology across control systems, energy management and the integration of multiple energy sources including to network infrastructure.

Hybrid Systems recently announced the expansion of its national footprint through the establishment of operations in the Northern Territory. The geographical location of Digital Intelligence aligns with this expansion and increases the business' capacity and commitment to deliver projects in the NT.

Hybrid Systems has worked with Digital Intelligence since 2018. Executive Director Mike Hall recognised this past relationship and the value that Digital Intelligence brings to the group with the increasing number of projects requiring multiple sources of energy and storage to be integrated, synchronised, monitored and controlled.

"The Hybrid Systems team has enjoyed an excellent working relationship with Digital Intelligence, working collaboratively on numerous projects over the last four years, including a number of large-scale BESS projects.

We are excited about having the team bring their particular expertise in-house and bolstering our capability in the high-end control systems and instrumentation space so we can enhance our value proposition to clients."

-END-

## Notes to Editor:

- Hybrid Systems Australia (HSA), is the integrated renewables subsidiary of Pacific Energy Group, acquired by Pacific Energy in 2020.
- Owned by QIC, a globally significant infrastructure investor since 2019, Pacific Energy is one of Australia's leading producers of sustainable distributed energy.

## Company Biography

### Hybrid Systems Australia

Hybrid Systems Australia (HSA) is headquartered in Perth, Western Australia with operations in the Northern Territory, and specialises in the provision of renewable energy services, which incorporate all aspects of design, procurement, manufacturing, testing, installation, commissioning, and operating grid-connected or off-grid renewable energy and storage systems. This includes systems with varying combinations of Solar PV, Wind, Stand Alone Power Systems (SPS), Battery Energy Storage Systems (BESS), Hydrogen and back-up thermal generation. HSA is a subsidiary of the Pacific Energy Group, which is owned by QIC, a globally significant infrastructure investor.
